HOWARD E. GATES

U. S. Department of Agriculture

Field Collector of Cacti in the
Western United States and
Lower California, Mexico

119 S. Illinois Street
Anaheim, Calif.

619322

Our specially built cactus carrying truck on
the main road in Lower California, Mexico

~~~~~

All these carefully selected, healthy  
plants are priced with free delivery  
to any part of the United States.  
Minimum order \$1.00

### VISITORS

We have a very interesting collection  
of plants at Anaheim, but owing to  
our frequent absences in the desert,  
we must request visitors to arrange  
for an appointment before calling.

### CACTUS SHOW AWARDS

At the Fourth Annual Show (May,  
1932) of the Cactus & Succulent  
Society of America we were awarded:  
First prize for Best Collection of  
Cacti. Eight firsts and one second  
for collections of different genera of  
cacti. Six firsts and two seconds for  
best individual specimens of various  
cacti species.

## GENERAL LIST

\* \* \* \*

- Acanthocereus pentagonus**—An attractive medium sized cereus type, 3 to 6 ribs .....75c, \$1.00
- Carnegia gigantea** — The Arizona Giant. Largest Cactus in the U. S. ....Write us
- Coryphantha deserti**, Type "a"—A small biscuit shaped plant, white spines, sprinkled with straight dark ones, pink flower from Nevada .....15, 25, 35, 50c
- Coryphantha deserti**, Type "b" — A little taller and whiter than Type "a". Salmon flowers, from Nevada .....15, 25, 35, 50c
- Coryphantha deserti**, Type "c"—Taller and darker than the above forms. The true deserti from California .....15, 25, 35, 50c
- Coryphantha recurvata**—Very large round heads, yellow recurved spines, yellow flower .....35, 50, 75, \$1.00
- Coryphantha**, new species — Large single headed plants, white spines inter mingled with dark ones. Large pink flower. From Utah .....25, 50, 75c
- Echinocactus polycephalus** — Large heads with long gray spines. Singles .....25, 35, 50c. Clusters 75c up
- Echinocereus engelmannii**—A cluster cactus with vari-colored straight spines. Magnificent large magenta flower. Singles .....15, 25c. Clusters 35c up

- Echinocereus mojavensis**—Forms clusters of large green "pickles" with white or gray spines. Scarlet flower. Singles .....15, 25c. Clusters 35c up
- Echinocereus octacanthus**—Forms clusters of smaller, more compact heads than Mojavensis. Red flower. From Utah. Singles .....15, 25c. Clusters, 35c up
- Echinocereus rigidissimus** — The beautiful Arizona rainbow cactus .....25, 35, 50c
- Ferocactus acanthodes** — The red spined, California barrel cactus. Yellow flowers .....25, 35, 50, 75c up
- Ferocactus colvillei** — An Arizona beauty. Heavy spines .....50c up

- Ferocactus johnsonii** — A small round straight spined plant with many reddish straight spines. Flower pink with red blotches .....15, 25, 35, 50c
- Ferocactus johnsonii, dark form**—Another species or a soil variation. Lavender gray spines. Yellow flower .....15, 25, 35, 50c
- Ferocactus viridescens**—The squat, heavy spined nigger head from San Diego County .....15, 25, 35c
- Hamatocactus setispinus** — An attractive, small, short spined cactus from Texas. Many beautiful yellow flowers followed by red fruit .....15, 25, 35c
- Harrisia martini**—A slender climbing cactus with a very large white blossom. Fine to use as a grafting stock .....50, 75, \$1.00
- Lemaireocereus thurberi** — A pipe organ cactus. A large upright cereus type. Plants from one to five feet .....\$2.50 per foot
- Lophophora williamsii**—The peyote or mes-cal button. Contains a narcotic. Used in Indian ceremonials. Spineless. Very strange .....25, 35c
- Neomammillaria dioica**—White spines, few dark hooked spines, forms clusters .....15, 25, 35c
- Neomammillaria grahami** — White spines, few dark hooked spines, pink flower, red fruit .....15, 25, 35c
- Neomammillaria heyderi**—A flat, milky type, white spines, white flower, red fruit ..... 15, 25, 35c
- Neomammillaria johnstonii** — Rare. Flat milky type, red spines, yellowish flower .....25, 50, 75c
- Neomammillaria macdougallii**—Larger than Heyderi. White spines .....15, 25, 35c
- Opuntia arbuscula**—Forms a compact bush of small branches .....15, 25, 35c
- Opuntia basilaris**—(Beaver tail). Purplish pads, very minute spines, magnificent magenta flower. Very showy. Easy to grow .....15, 25, 35c
- Opuntia basilaris**—Yellow flowered form, 25c
- Opuntia new species**—Of Basilaris group, long spines, pink flower, from Utah, 25c
- Opuntia chlorotica**—A large upright type, blue pads, slender drooping yellow spines. Quite rare .....50, 75c up

- Opuntia erinacea**—The pink spined grizzly bear cactus. Yellow flower .....15, 25 35c
- Opuntia leptocaulis** — A miniature tree. Bright red fruit in winter .....15, 25, 35c
- Opuntia ramosissima** — Many small woody branches .....25, 35, 50c
- Opuntia Santa Rita**—Upright, blue pads, nearly spineless, yellow flower ....35, 50c
- Opuntia spinosior**—Attractive green stemmed cholla. Purple flower .....15, 25, 35c
- Opuntia treleasii**—One of the basilaris group with many small spines .....15, 25, 35c
- Opuntia ursina** — The long white spined grizzly bear cactus. Pink flower, 25, 35, 50c
- Phellosperma tetrancistra**—Resembles *Neograhami*, but rare. Large pink flower .....25, 35, 50c
- Sclerocactus whipplei**—Hooked spined, pink flowered species from Utah .....35, 50, 75c

All of the above plants are delivered free within the United States when the order amounts to \$1.00 or more. We will gladly quote prices on large specimen plants upon request. We label one of every species in each shipment. We are receiving a pleasing number of repeat orders and we are rapidly building up a large clientele of satisfied customers.

## PLANTS FROM LOWER CALIFORNIA, MEXICO

These plants are propagated from our own collections in Lower California, in which territory we have had a wider experience than any other collector. Our collection of these species is the best in the United States. Prices on these are higher than prices on local species owing to the great cost in time, money and health it has required to assemble our stock of mother plants.

- Bartschelia schumannii**—Forms low clusters of small white spined heads, beautiful pink flower, red fruit .....\$1.50
- Cochemeia halei**—Forms clusters, straight purplish spines, scarlet flower shaped like a *Zygocactus*. Very rare .....\$2.00
- Cochemeia poselgeri**—A wonderful but little known plant.....Write us

- Echinocereus brandegeei**—A tall headed, straight spined cluster plant, purplish flowers .....\$1.50
- Echinocereus barthelowanus**—Short heads, very compact clusters, purplish spines .....\$1.50
- Echinocereus maritimus**—Short heads, very compact clusters, beautiful yellow flower .....\$1.50
- Echinocereus pensilis**—One of our rarest species .....Write us
- Echinocereus sciurius**—Small, white spined mammillaria like clusters. Large pink flower .....\$1.50
- Grusonia new species**—Our own discovery. Second species known of this genus. See Opuntia No. 131, July, 1931 Cactus & Succulent Journal .....\$2.50
- Lemaireocereus littoralis**—A dwarf lemaireocereus. Very rare. See July, 1931, Cactus & Succulent Journal .....Write us
- Lophocereus schottii**—18 inch rooted, hairy, tip cuttings .....\$7.50
- Lophocereus schottii monstrosa, sargentianus and australis**—Illustrated August, 1931, and February, 1932, Cactus & Succulent Journals .....Write us
- Machaerocereus eruca**—The creeping devil cactus .....Write us
- Neomammillaria la pacena**—A new species. See Feb., 1932 "Desert Magazine", \$1.50
- Neomammillaria No. 68** — New species, slightly resembling N. fasciculata but larger. Pink flowers, red fruit .....\$1.50
- Neomammillaria No. 128**—See August, 1931, Cactus & Succulent Journal .....\$1.50
- Peniocereus johnstonii** — An exceedingly rare tuberous rooted cactus. ....Write us
- Pereskiopsis porteri**—Leafy climber, yellow flower, beautiful long orange colored fruit. Seedlings over six inches high .....50c
- Pereskiopsis gatesii**—New species. See Feb. 1932, Cactus & Succulent Journal ....\$1.00
- Opuntia burrageana**—Slender cylindric type, many dark short spines .....\$1.00
- Opuntia cholla**—The cylindric species properly named "Cholla" .....\$1.00
- Opuntia ciribe** — Beautiful white spined cylindric species .....\$1.00

- Opuntia gosseliana** — Beautiful, green flat padded opuntia, yellow flower .....\$1.50
- Opuntia invicta** — Grows like an Echinocereus. Yellow flower and fruit. Write us
- Opuntia tesajo**—Small, woody, branching, yellow flowered species. Rare .....\$1.00
- Opuntia No. 95. New species**—Very slender cylindric type. Red fruit .....\$1.00
- Opuntia No. 117, possibly clavelliana**—Long joints, long spines, bronze flowers, cylindric .....\$1.00
- Opuntia No. 136, new species**—Blue padded, white spined, platyopuntia. See Tuna Morada, July, 1931, Cactus & Succulent Journal .....\$1.50
- Opuntias No. 141, 145, 151**—Un-identified cylindric species .....\$1.00
- Wilcoxia striata**—Another very rare plant. Grafted plants .....Write us
- Pedilanthus macrocarpus, a Euphorbia** — Produces many tall, smooth, leafless, rod like branches topped with red flowers .....\$1.50
